## Expert Advice

Daniella Segal of online boutique, Acorn & Will, explains how to approach the style:

"Vintage works best when it evolves naturally over the years: don't attempt to devise a complete scheme all in one go, because the effect will be too staged. The key is to keep the look mismatched, so try not to aim for a co-ordinated result. Rather, be creative and trust that if every piece you collect appeals to you, then it will work with what you already have to create a charming, eclectic effect. Remember also that the appeal of vintage stems from its individuality, so don't be afraid to experiment with clashing patterns and colours."
